

STxx-865-yS

Description: LED Sign Module

- Simple and easy installation
- Long life with high efficacy
- Integrated heat sink for cool operation
- Class 2 rating simplifies wiring

Ordering Code	Nominal Measurements					
	Length	Configuration	Voltage (V)	Initial Lumens ⁽¹⁾	Power (W)	Lm/W
ST24-865-SS004C	24"	Single Sided	24	680	6	113
ST24-865-DS004C	24"	Double Sided	24	1,360	12	113
ST36-865-SS004C	36"	Single Sided	24	1,020	9	113

ST108-865-DS004C	108"	Double Sided	24	6,120	54	113
ST120-865-SS004C	120"	Single Sided	24	3,400	30	113
ST120-865-DS004C	120"	Double Sided	24	6,800	60	113

(1) MID Flux Bin Values are shown for CCT of 6500K. Multiply lumens and Lm/W by 0.92 for 3500K. Tolerance of ±6.5% at 25°C.

General Performance Specifications:

- Lumen Maintenance : L70 > 140K Hrs @ 25°C
- Lumen Maintenance : L85 > 60K Hrs @ 25°C
- Color Consistency: < 4 SDCM (6500K)

Application:

- Min. Ambient Operating Temp.: -22°F, -30°C
- Max. Ambient Operating Temp.: 140°F, 60°C
- Ingress Protection rating: IP64

Warranty:

- 5 Year Limited Warranty

Note: Lumen maintenance based on LM80 testing and TM-21 calculation projections

Installation Guidelines

- Module is to be mounted using standard R17D recessed double contact (RDC) lampholders where the spring tension will hold the module in place. Lampholders are not used for electrical connections.
- Leads that exit the end of the module are used for connection to the 24Vdc supply.
- Module(s) may be wired individually to the driver or connected end to end in a daisy chain fashion.
- It is only necessary to connect one end of the module leads to the power supply. Leads on the opposite end are at the same electrical potential and may be connected in parallel to another module or capped individually.

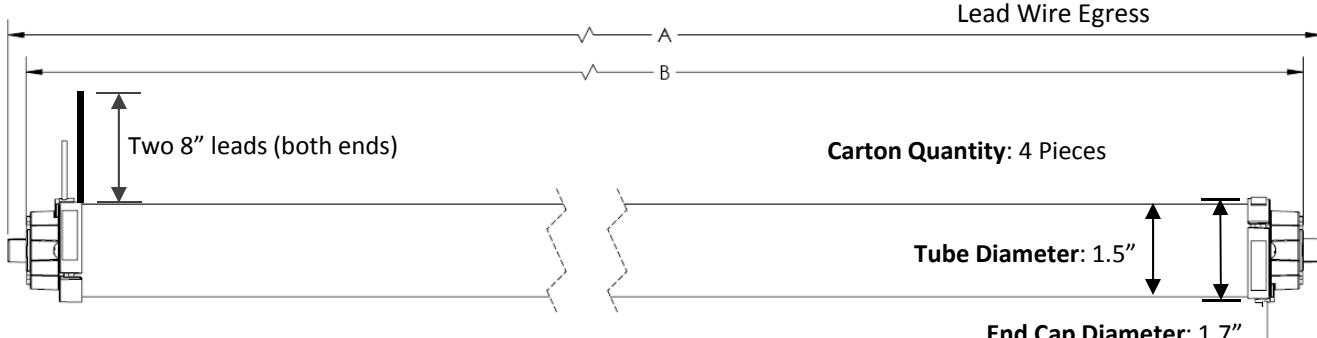

Dimensions	Dim. A	Dim. B
ST24-865-xx	21.8"	21.2"
ST36-865-xx	33.8"	33.2"
ST48-865-xx	45.8"	45.2"
ST60-865-xx	57.8"	57.2"
ST72-865-xx	69.8"	69.2"
ST84-865-xx	81.8"	81.2"
ST96-865-xx	93.8"	93.2"

Conditions of Acceptability

The LED Arrays were judged on the basis of the required spacings in the Outline of Investigation for LED Light Sources for Use in Lighting Products, UL 8750.

1. The LED Array modules are intended for connection to an LED Driver with constant voltage, Class 2 output. When the arrays are connected and used with power supplies other than class 2, the need for an additional evaluation shall be considered in the end use product investigation.
2. The LED Array modules shall be installed in compliance with the mounting, spacing, casualty, and the segregation requirements applicable to the ultimate application.
3. The Normal Temperature Test must be performed in the end-use application and the measured temperature should not exceed the maximum RTI rating of the materials used for the construction of the LED Array.
4. The LED Array modules are suitable for use in "DRY" and "DAMP" locations when connected to a Class 2 source of supply.
5. The material of the LED Array End-Cap/holders and the material used for lens were not specified. The suitability of the material of the LED Array End-Cap/holders along with the material for the lens shall be determined in the end-application.
